

# Ontology Summit 2009

## Toward Ontology-based standards

April 6-7, 2009

Steve Ray

# Summit Goal

To articulate the power of synergizing these two communities (ontology and standards) in the form of a communiqué in which a number of concrete challenges can be laid out. These challenges could serve as a roadmap that will galvanize both communities and bring this promising technical area to the attention of others.

# Structure of the Summit Symposium

## April 6-7, 2009

- Compile a list of candidate projects that demonstrate the power of ontologies in standards
- Discuss the issues and barriers
- Finalize a short-list of endorsed projects
- Preparation and delivery of a communiqué
