Ontolog Conference Call 4/15/2010:

Developing a Registry of Ontology-Centered Educational and Training Initiatives

Dr. Arturo Sánchez-Ruíz
School of Computing
University of North Florida

Ontology Summit 2010

- [Communiqué](#) recommended action:

"We recommend the development of a registry, allowing members of the community to add information about ontology-centered educational and training initiatives. " [[Reference](#)]

Preliminary Ideas (1)

- This would be an <u>ontology-based</u> registry—with a web interface, and perhaps also a service interface—that would allow members of the community to add information about their educational and training initiatives which are ontology-centered

- The system interface/s would provide the community with dynamic—and hopefully current—answers to a variety of queries and also with access to shared educational and training resources

Preliminary Ideas (2)

- An interesting approach that can be explored is the development of this registry with a team of students from different universities—and different countries—in the context of capstone-like courses

- (There might even be agencies that might fund this project or portions of it—Any ideas?)

Want to Join Us? (1)

- [Dr. Antony Galton](#) (University of Exeter, UK) and I are interested in coordinating this initiative

- Dr. Galton is the organizer of the [FOIS 2010 Workshop on Ontology Education](#) (May 11-14, 2010—Toronto, Canada)

Want to Join Us? (2)

- One way to join us is by attending the FOIS conference and this workshop

- You can also send us a note to let us know you are interested in participating [Arturo; Antony]
