

Ontologies for Big Systems – Promises and Challenges

Symposium Panel

April 13, 2012

Panelists

- Line Pouchard, Oak Ridge National Laboratory
- Paul Hofmann, Saffron Technology
- Olivier Bodenreider, NIH
- George Strawn, NCO NITRD

Panel Questions

- 1 Why are ontologies important to the success of your work?
- 2 Can you share any specific success metrics from the application of ontologies?
- 3 How does your work fit into the Big Data picture (if at all)?
- 4 What are some of the exciting initiatives that you've seen - who should we watch and why?
- 5 What is the killer app using your work that you're hoping to see emerge over the next few years?
- 6 Why are ontologies essential for modeling systems?
