## Ontology Summit 2013 Fabian Neuhaus

national center for ontological research

## Goals

- advance ontology as science
- foster development of high quality ontologies
- develop measures of quality for ontologies to establish best practices

http://ncor.us

## Expectations

- Stance against relativism
- Three questions
  - What are the metrics for quality?
  - How do they relate to requirements for ontology development?
  - How do we measure quality and whether requirements are met?
- Existing practices and tools
