Coverage requirements
from various materials presented during the summit, especially those that identify:

- evaluable characteristics of ontologies,
- metrics and methods for such evaluation,
- lifecycle stages
- maturity models of ontologies and/or evaluation
- useful faceting characteristics of ontology characteristics
- characterizing ontology internally,
- characterizing ontology externally,
- characterizing relation of ontology specifics to particular use or application context
- context dependence of relevance of characteristic to quality/suitability
- context independence of relevance of characteristic to quality/suitability
- automatability ...

Is A OR Has a OR Implies (OWL Vs BPMN?)
