- a platform for knowledge sharing and open collaboration
- Quality and reliability
- a Dynamic Knowledge Repository comprising the body-of-knowledge accumulated through a persistent archive of all community interactions

The Time Has Come ...

- for Big Data and Semantic Web to Meet Applied Ontology
- from Science to Engineering
- from Research to Development to Application
- from “weak signals” to “huge impact”
- our role: foster and facilitate collaboration
- keep the foundational building blocks “open” and “accessible” to all
