University of Manchester, UK

Mission Statement

The Web of Data . . .
provides great opportunities for ontology-based
services,
but also puts challenges to *tools* for editing and using
ontologies,
and to *techniques* for ontology engineering.

Research Questions

- How can tools and techniques scale to the Web?
- How can services benefit from tapping into the Web?
How can they help to make Big Data manageable?

Discuss at http://ontolog.cim3.net/cgi-bin/wiki.pl?OntologySummit2014_Ontology_Tools_Services_Techniques_Synthesis or on the mailing list!

This Session

- **TillMossakowski:** scaling an ontology tool suite (Hets/Ontohub) from “reasoning in the small” to the Web
- **ChrisWelty:** the potential of linking Big Data to ontological reasoning, as demonstrated by the IBM Watson natural language question answering engine
- **AlanRector:** OWL and alternative modeling techniques, reviewed from the perspective of engineering knowledge-rich systems.
