2013-02-27

# Ontohub

**Ontohub**: web-based repository engine for distributed heterogeneous (multi-language) ontologies

- prototype available at [ontohub.org](http://ontohub.org)
- mid-term goal: follow the OOR architecture and API

**Current status:**

- Mirrors of important repositories: BioPortal, Tones, COLORE, CoCOP
- used as repository for the FOIS competition
- central new feature: git integration
  - git versioning available
  - any git client and the web front-end can be used in parallel
  - **still some consolidation needed**

# Expected Deliverables

- Consolidation of Ontohub
- Work on milestones, close at least 5 issues of each milestone:
  - “Refactoring after FOIS”:  
improvement of code quality
  - “Make FOIS version more stable”:  
fixing minor bugs and completing existing features
- integration of new programmers (e.g. one at Magdeburg)
- Feedback from test users

# Work Plan

Saturday, March 29th

- 1:00am PDT / 4:00 am EDT / 10:00am CET:  
**work on milestones**
  - Ontohub codebase and issue tracker:  
[github.org/ontohub/ontohub](https://github.com/ontohub/ontohub)
- whole day:  
**feedback from test uses welcome**
  - quick deployment of fixes at [develop.ontohub.org](https://develop.ontohub.org)
  - issue tracker at [github.org/ontohub/ontohub/issues](https://github.org/ontohub/ontohub/issues)
  - Wiki at [wiki.ontohub.org](https://wiki.ontohub.org)
- 4:00am PDT / 7:00am EDT / 1:00pm CET: **Skype conference**
  - status report
  - reflection on code guidelines
