

# SemanticWiki mini-series Session-5 Lightning Talk - 2009.02.12

- Protégé: open source ontology editor and knowledge-base framework
- Protégé community: over 100,000 registered users as of January 2009
- Protégé wiki: <http://protegewiki.stanford.edu/>
- Wiki software:
  - MediaWiki 1.13.2
  - Semantic MediaWiki 1.4.0
  - Semantic Forms 1.3.9
- Protégé wiki is used to organize the large library of plug-ins developed at Stanford and by the user community.
- Semantic MediaWiki allows the Protégé team to offer wiki pages with dynamically generated lists of plug-ins falling into various different categories.
- Lessons learned:
  - Easier to navigate plug-ins library
  - Harder for users to make submissions to the library
