

Semantic wikis: the race has begun! *thoughts from a business perspective*

Semantic wikis compete in the Enterprise 2.0 and Business Intelligence 2.0 market!

business intelligence 2.0 tools

social enterprise 2.0 tools

B.I. and enterprise 2.0 tools are converging to become collaborative business dashboards:

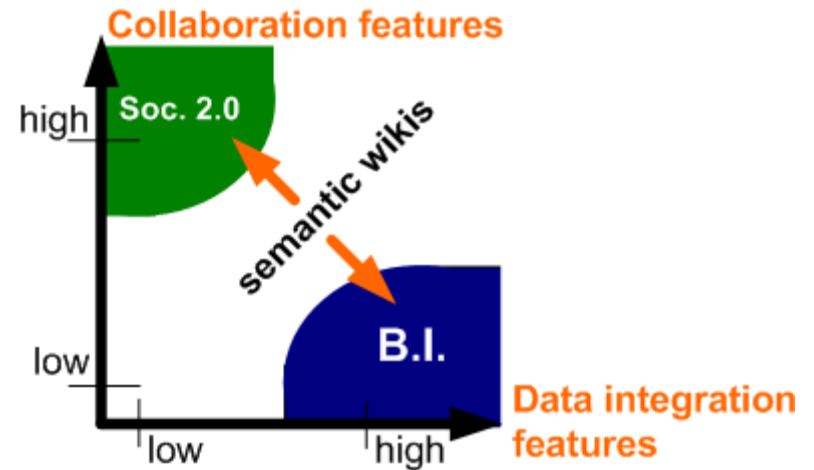

introduce, share and collaborate on business artifacts, like documents, emails, reports, PPM-, PLM-, CRM-data ...

Semantic enterprise wikis will set the pace in this pincer movement of both markets and become business mash-up platforms!

We are putting the pedal to the metal!

Task list 2009:

- Drive state-of-the-art wiki features to perfection with semantics.
- Make (domain) modeling work fun for the man on the street.
- Embed the wiki into everyday's work routine.
- Attract integration partners to interconnect with ERP, B.I., CAx...
