

**SemanticWiki mini-series session-6: concluding session**

# Semantic Wiki

## Session 4 - summary

Semantic Wiki Applications and Use Cases (1):  
Vertical Applications

**co-chairs: Mike Dean (BBN) and Peter Yim (CIM3)**

5-Mar-2009

# Session 4: Semantic Wiki Applications and Use Cases (1): Vertical Applications

- Chaired by Mike Dean and Peter Yim, 22 January 2009
- Harold Solbrig: LexWiki
- Harold Solbrig: BiomedGT
- Guoqian Jiang: WHO ICD11 Wiki
- Jie Bao: Mesh-up Map and Events on Semantic Wiki
- Christoph Lange: Semantic Wikis for Mathematics
- Lightning Talks:
  - Daniel Hansch: SMW+ 1.4
  - Kei Cheung: Wiki Neuron
- Q&A and open discussion

# Session 4: Semantic Wiki Applications and Use Cases (1): Vertical Applications

- First of 2 sessions devoted to applications
  - Vertical: specific to a given domain
  - Horizontal: more domain neutral
- Great examples of vertical applications in Health Sciences and Academic & Research were showcased in this session
- Semantic Wikis have clearly emerged from the lab and provide a viable platform for applications
  - Somewhat displacing other forms of portals
